Sofía Cárdenas

STUDENT OF IT SYSTEM

I am a student of Engineering of Information Technology System with great interest on software developing. I am looking for oportunities that allow me make use of my abilities to contribute in the development of innovative solutions.

PROJECTS

FRONT-END DEVELOPER (OCCE)

Frebruary 2023 - June 2023

- I participated in the OCCE project (by its initials in Spanish, *Orientación Curricular para Coordinadores y Estudiantes*). I was in charge on the design, working with CSS.
- OCCE was developt as a tool for coordinators of each department in Universidad de Sonora (UniSon) to facilitate the making of the schedule for each semester, and therefore giving the students a better experience choosing the subjects they need to course at the moment.

UI DESIGNER (CAFES)

January 2024 - May 2024

- CAFES (*Centro de Asesoría Financiera y Emprendimiento Social de la Universidad de Sonora*) is an approach created by the Department of Economics at UniSon to broadcast the financial culture in Sonora. I was in charge of create wireframes and UI components in Figma.
- We developed a desktop app for CAFES with the objective of help them to organize, accept or reject the projects proposed by general public, professors or students.

TECHNICAL WRITER (dogOS)

August 2024 - November 2024

- The system dogOS is an integral web solution to improve the operative efficiency and client experience for this hot dog cart business. The app would allow the client to order food from the menu, and the admin would manage those orders (acept or reject).
- I worked closely with the developers and testers to create user-friendly documentation, specially writing the user manual and installation guide.
